☐ Please call about this case prior to fabrication.
☐ Enroll this case in Appliance Protection (Additional fee).
☐ Please make this design a MyWay™. (Representative will call.)
☐ MyWay™ # ☐☐☐

This is a list of our most popular designs. All appliances below will be constructed to NorthStar's Standard unless otherwise noted.

☐ U ☐ L **Invisible Retainer** ☐ With Resets (Please indicate teeth to be reset.)
Pressure-formed clear material for precision and durability. May be constructed with or without resets.

3 2 1 | 1 2 3
3 2 1 | 1 2 3

☐ U ☐ L **Standard Spring Complete**
Please indicate teeth to be reset.

3 2 1 | 1 2 3
3 2 1 | 1 2 3

☐ U ☐ L **Plaster Study Model**
☐ Standard (pour, trim, sculpture, label, and polish)
☐ Through-Label (pour, trim, sculpture, label)

☐ U ☐ L **Digital Study Model (DSM)**
☐ Standard Finish DSM (full sculpting)
☐ Progress Finish DSM (no sculpting)
☐ Unbased DSM (no virtual base added)
☐ Standard ☐ Progress

☐ U ☐ L **Lingual Arch** ☐ Fixed ☐ Removable
The Lingual Arch may be constructed with or without adjustment loops, depending on the need for pressure on the anterior teeth to guide alignment.

☐ U ☐ L **Flat Plane Full Contact Splint**
Trimmed to a flat plane for even contact with the opposing arch. 'Ball' clasps may be added for retention. Please include an opposing model & centric bite registration opened 2-3mm in posterior.

☐ U ☐ L **Standard Hawley Retainer**
Considered the classic retainer. May be fabricated for pure retention or with the addition of springs for minor last minute corrections.

☐ U ☐ L **Wrap Around Retainer**
With a continuous bow that does not cross the occlusion, the Wrap Around is a good choice for tight occlusions. Light wires are added (typically distal the laterals) to provide support for the archwire until your patient becomes comfortable with the appliance. These wires are easily clipped later for maximum interdigitation.

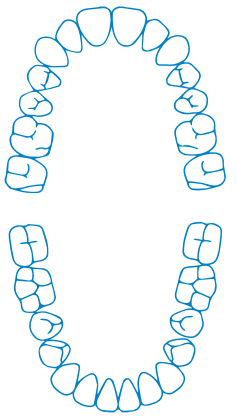
☐ U ☐ L **Circumferential to Adams Retainer**
This clasped retainer gives you the benefit of a Wrap Around in that it does not cross the occlusion but adds the flexibility and security of retention.

☐ U **RPE (Rapid Palatal Expander)** ☐ Bondable
Snap-Lock screws are provided with no upgrade charge. Available in banded or bondable versions. For bondable please include an opposing model and a bite registration with centric A/P relation and 2-3mm posterior opening.

☐ U **Nance** ☐ Small Button ☐ Large Button
The Nance appliance adds an acrylic button to a Trans-Palatal Arch. Buttons may be either small (pea sized) or large (nickel sized). The button is placed toward the anterior to aid as a reminder for the tongue.

☐ U ☐ L **Band and Loop Space Maintainer**
Band and Loop appliances are the long-time standard for space maintenance when there is early loss of primary teeth. NorthStar's appliances are designed to allow for the eruption of permanent teeth.

☐ U ☐ L **Design your Own / Special Instructions**
Please draw and describe the appliance you desire.



Lab Use Only: BBP?
